

AI in Healthcare Online Masterclass

April 30, 2020 by BiopharmaTrend

The healthcare industry is evolving rapidly with large volumes of data and increasing challenges in cost and patient outcomes. In this evolution, artificial intelligence (AI) has started playing a key role towards providing personalised patient experiences, streamlined operations and improved bottom lines. Early adopters of AI in the healthcare space are reaping the benefits in terms of patient care and adding to their bottom line results. These companies are using AI in a number of scenarios like managing claims, detecting fraud, improving clinical workflows, and predicting hospital acquired infections.

The masterclass will enable the participants to learn how to leverage AI for providing better patient experience, optimise operational efficiency and improve business performance.

Online Masterclass on AI in Healthcare is scheduled to take place on **May 29, 2020**.

For details, visit: <https://masterclass.economicstimes.indiatimes.com/courses/ai-in-healthcare/420>

Agenda:

- Necessity of AI & ML in Healthcare
- Opportunities of AI in Healthcare
- Addressing Challenges of AI Implementation
- Impact of Online Medicare
