

# Intelligent Health AI 2020

June 25, 2020 by BiopharmaTrend

## The world's leading AI in Medicine Summit

Intelligent Health is the only large-scale, global summit series focused purely on AI in healthcare! Our CPD accredited summits bring the global AI and health community together to advance discussions on how to apply AI and drive technological collaboration in healthcare.

For 2020, we have decided with our ecosystem, to go ahead with Intelligent Health but digitally in a new, exciting and innovative way, that will focus on content and active participation in a democratised way, from the Global North, South, East and West – healthcare without borders.

Our 54,000 global community is invited to join industry-leading speakers for an in-depth look at AI within the health market, how it can be used to prevent and solve some of the world's greatest healthcare problems, improve the health of the human race and set the AI agenda in healthcare for 2020 and beyond.

Networking including 1:2:1 chat roulette, live video meetings, CPD accredited content (live and available on demand post show), so that you can plan around the clock in any time zone and play sessions at a time that suits you.

9-10 September 2020
