

AI-ML Drug Discovery Summit 2021

Nov. 23, 2020 by BiopharmaTrend

R&D & Clinical Processes for the Future: Accurate, Efficient & Cost-Effective

The AI-ML: Drug Discovery Summit is the industry's definitive guide to translating the wealth of tech available to successfully implement a working and practically effective drug discovery and development platform.

Designed with leading AI experts from R&D and clinical departments across big pharma, biotech, and academia, this year's forum features 3 days of real-world case studies and interactive discussions. As such, the 2021 AI-ML Summit will provide you with a roadmap to augmented R&D and clinical decision making with reduced failure rates, increased speed, and improved margins.

This is a critical time for drug developers to make more data-driven decisions, and at the 4th AI-ML: Drug Discovery Summit you will learn how to strategically leverage AI technology to transform your pipelines, and patient's lives.

Join 80+ like-minded peers who are overhauling outdated R&D and clinical processes to reflect on both successes and failures, and importantly the lessons learned along the way from the last year of implementation and utilization.

Join us for the lead R&D AI Event - 4th AI-ML Drug Discovery Summit, taking place next January 26-28 2021. Get your ticket now <https://ter.li/qbwz2y>
