

# FREE WEBINAR: AI solutions for healthcare providers

Jan. 14, 2022 by BiopharmaTrend

Artificial intelligence (AI) is a powerful and disruptive area of computer science, with the potential to fundamentally transform the practice of medicine and the delivery of healthcare.

**Wednesday, 30 March 10am EST, 4pm CET**

AI technologies provide a deep understanding and forecasting of personnel performance, cost optimization, care setting utilization, and patient success.

Discover how to benefit from the integration of modern AI tools into clinical, operations, administration, and IT departments.

Who should attend - CIO and CTO, Head of analytics of Healthcare companies using or considering advanced or predictive analytics as a competitive market advantage.

During these two days of the web conference you are going to learn how to:

Advance and personalize the patient experience

Utilize analytics to track outcomes and control costs of care

Let your data speak to get actionable insights

Optimize patient care journey

Personalize prescriptions and get the best prices on your medications
